MEMORANDUM FOR: Director of Security ~~XXXX~~
FROM: [redacted]
Deputy Director of Security (P&M)
SUBJECT: DDA Discussion Items

Bill:

I would suggest the following items for discussion with the DDA on 15 September 1983:

- * The New Polygraph School: The renovations are complete, and a visit is appropriate.
- * [redacted] Clerical Pay: Both OS and OD&E have serious problems on the [redacted] See the attached material.
- * ODP Assignee to the Office of Personnel: There is great potential in the computer area in terms of the Applicant Processing Communications System, and OP surely needs an ODP careerist. Early indications are that they want to draw fully on our man, [redacted] [redacted] This is a Directorate problem.
- * Security Awareness: The briefings of CI Staff on 15 September went well, except for the fact that [redacted] is resurrecting the "cohabitation" issue and made it known that an Agency directive should be issued.

NOTE TO FRED:

1. Attached is the info of the Applicant Processing Communications System (APCS) as requested. Please note as per our conversation and my conversation with Skip that it is too early at this time to predicate the amount of effort which will be required on my part. All I can say at this point is that it has the potential of absorbing a good deal of my time during the September through January timeframe. Also, [redacted] stated in his opening comments to the group that this effort was to have "top priority."

2. The group has met twice so far and another meeting is planned for next week. The first two established the overall responsibilities and identified the working group members:

ODP/QAD
OMS
OP
OS

Our responsibilities were defined as:

- Document current flow/functions September
- Define office level user requirements October
- Develop coordinated/consolidated APCS user requirements November

3. The amount of effort required will depend on the scope, documentation standards adopted, and the level of detail expected. I was able to use Dottie's paper for documenting OS's current flow/functions (Requirements for Office Automation, dated October 1982). This will be presented to the APCS team members next week. The remaining two tasks will have to be developed from scratch and will require considerable effort.

4. As you can see, the proposed timeframe overlaps with the CFO activities and [redacted] move. Perhaps we may be able to minimize our effort by addresssing only those interface requirements needed for SIMS and insisting that OP take the lead/responsibility for developing the overall requirements.

STAT

5. of OP are the ADP Control Officers. OP has not, to my knowledge, identified an ODP person to handle their requirements.
